Ensuring a Blind Peer Review

To ensure the integrity of the blind peer-review for submission to this journal, every effort should be made to prevent the identities of the authors and reviewers from being known to each other. This involves the authors, editors, and reviewers (who upload documents as part of their review) checking to see if the following steps have been taken with regard to the text and the file properties:

1. The authors of the document have deleted their names from the text, with "Author" and year used in the references and footnotes, instead of the authors' name, article title, etc.
2. With Microsoft Office documents, author identification should also be removed from the properties for the file.

For **Microsoft 2003** and previous versions, and **Macintosh** versions of Word:

- o Under the File menu select: Save As > Tools (or Options with a Mac) > Security > Remove personal information from file properties on save > Save.

For **MacIntosh Word 2008** (and future versions)

1. Under the File menu select "Properties."
2. Under the Summary tab remove all of the identifying information from all of the fields.
3. Save the File.

For **Microsoft 2007** (Windows):

1. Click on the office button in the upper-left hand corner of the office application
2. Select "Prepare" from the menu options.
3. Select "Properties" for the "Prepare" menu options.
4. Delete all of the information in the document property
